CONNECTION

It doesn't matter what application you choose as your CRM, ERP, R&D, HR, etc. It doesn't matter if it's cloud or on-premise. The IConduct has all the connectors and deals with all the technical issues. All you're left to do is drag & drop the mapping and define the manipulation/validation using our logic library.

SALESFORCE

Integrate Salesforce with your ERP, R&D and marketing using SOAP or REST. You can also save money by integrating your production environment with sandbox.

ORACLE ERP

Need to integrate application or database level with any other business app? Whether using staging-tables and running concurrencies, or executing the API function, the IConduct Oracle Application ERP Connector ensures a quick and easy integration

NETSUITE

Use our full-featured connector to integrate accounts, contacts, opportunities & orders with just a few clicks.

AGILE PLM

Integrate parts, BOM & manufacturer items directly from the "Agile Content Service" to your ERP using our Agile connector. Marketing parts can go directly to your CRM.

SUGAR CRM

The IConduct SugarCRM Connector seamlessly integrates with any cloud or on-premise business application, within hours, allowing data and business processes to flow across the organization

EMAIL

Query any label you wish. Get/Send emails, including subject, body & attachment with ease.

SAP

Integration to SAP with no coding seems like an impossible mission? The IConduct makes it possible. Using our unique SAP R3 Connector, all you have to do is drag & drop your mapping from any entity in any application to your pre-existing or custom BAPI.

SHAREPOINT

Whether you want to save your files to SharePoint directly from Salesforce to minimize storage, or upload list items to the cloud - our SharePoint connector will do it for you.

DYNAMICS CRM

From version 4.0 to 2015, from on-premise to 365 - IConduct will connect to your Dynamics CRM and allow you to integrate it, both ways, with any other business application.

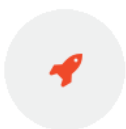

MONGODB

Bring any data you need from your Big Data platform like MongoDB. Our in-memory technology will handle all the manipulation and validation for your process at lightning speed.

TEAM FOUNDATION SERVER / JIRA

Open bugs directly from CRM case. Update bug status like fix release date and priority directly to your CRM.

SAVE UP TO 70% OF YOUR INTEGRATION COSTS

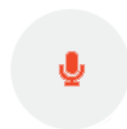

ROCKET SPEED INTEGRATION

We will integrate your business applications in days.

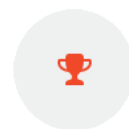

HYBRID ANY 2 ANY

Some applications are in the cloud and some applications are on-premise? No problem. The IConduct will integrate them seamlessly.

HASSLE FREE

No matter the protocols behind - XML, JSON, TCP, WSDL etc. - with IConduct your focus is on the business process only.

THE TOP SOLUTION FOR ALL YOUR APPLICATIONS

The top solution for all your IT needs - and with half the TCO.
